## **MIDDLEWARE DEVELOPER INTERNSHIP (M/F) – BANE TECH**

**Refª. do GIP/janeiro2025/10**

**DATA-LIMITE PARA CANDIDATURA: URGENTE**

### **MIDDLEWARE DEVELOPER INTERNSHIP**

#### **BaneTech:**

At Bane Tech, we are focused in building the best products for our customers, aligning business and technology. Elegantly built, our lightning fast products will weightlessly run at the core of your business, providing Key Performance Indicators in real-time with proper support and also a nearshore model.

#### **Responsibilities:**

- Develop horizontal scalable Integration Platforms (Middleware) in Java from requirement specifications in Apache Camel and Bane Tech FireFly.
- Contribute to the creation of libraries, APIs, and frameworks for Bane Tech's products.
- Participate in full software development lifecycle.
- Assist in drafting requirements and technical specifications.
- Perform unit testing to ensure software quality.
- Work on developing new features for state-of-the-art products and technologies, with a focus on enterprise integrations.
- Utilize technologies such as: Java, Apache Camel, REST and SOAP, Visual Studio Code, Apache Maven, MySQL, Shell Scripting, Git and UML.
- Collaborate in a cross-functional team using the Scrum methodology.

#### **Internship Details:**

- Duration: 6 months (or adaptable to the student's schedule).
- Includes preparing an Internship Report as part of daily activities.

**Required Experience:**

- Proficiency in Java programming language.
- J2EE experience with application servers.
- Knowledge of using APIs (e.g., REST).
- Basic understanding of database concepts and technologies (e.g., MySQL).
- Knowledge of the following: Visual Studio Code, Apache Maven, MySQL, Shell Scripting, Git and UML

**Workplace Type:**

- On-site

**Student Benefits:**

- Opportunity to join Bane Tech as a full-time employee after successful completion of the internship.

**Recruitment Process:**

- 1/2 interviews with the Bane Tech team.
